Dear Hiring Manager,

I am excited to be applying for the Software Engineering Intern Program. I am a fourth-year Computer science student at Assiut University. My degree emphasis is in computer science. I have completed many of my major's requirements, including the required classes outlined in your job description (Problem-solving skills, Data structure, Algorithms, OOP). What has motivated me to apply to this position is your firm's participation in several software projects and the ability for this position to be a part of that work.

I participated in many programming competitions such as ACPC and Google contests.

Last summer, I worked as a Software Engineering Intern for bld.ai, a startup company in the United States. I worked remotely as a full-stack developer with their engineers. I have completed two projects first one for the front-end using HTML, CSS, React.js, and the second one for the back-end using python, Django.

Thank you for reviewing my background in consideration for your internship opportunity. I would be encouraged to have the opportunity to meet with you to discuss more details of my coursework, prior internship, and other experiences relative to your position and company.

Sincerely,

Hossam Hassan
